

② 10, 9, 8, 7, 6, 5

③ 4, 10, 8, 7, 3, 5

④ 1, 10, 2, 9, 3, 8, 4, 7, 6, 5

⑤ 2, 7, 3, 8, 4, 5

⑥ 1, 2, 10, 4, 8, 5

①  
2, 7, 3, 8, 4, 5

②  
1, 2, 10, 4, 8, 5

We can observe from the above trees that cases b and d are not feasible as the basic condition that the keys should be accessible and search(5) in both the cases fails.

Another auxiliary observation that we can make is that trees a, c and e are unidirectional and grow either to the left or to the right.
